

easyAkkus: How to use

FREEZING & DISPOSAL

Freeze easyAkkus flat

Recommended ambient temperature refrigeration cell: at least -18°C

Recommended freezing duration:

	easyAkku Fresh & Green	easyAkku Freeze
outside the box:	2-3 days	3-4 days
inside the box:	5-6 days	6-7 days
in boxes on EPAL:	12-15 days	15-18 days

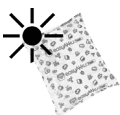

Disposal of foil material: recycling bin

Disposal of liquids:

easyAkku Green: sink, use for watering plants

easyAkku Freeze: sink

easyAkku Fresh: residual waste bin

When returning cool packs from a packing station to the freezer, they should be completely dry or separated so that they do not stick together.

STORAGE & TRANSPORT

Handle easyAkkus with care! Avoids bumps, contact with sharp/ pointed objects and dropping, as frozen cool packs are hard and sensitive.

Don't use damaged cool packs for shipping.

Use the recommended amount of cool packs depending on the size of the box, the duration of transport and the temperature to be maintained.

Place easyAkkus at the top of the box on the goods and/or on the side.

Avoid direct contact between cool packs and cold-sensitive products.

The content of the easyAkku is not intended for consumption.

Consumers can reuse the cool packs in their own fridges to keep food or drinks cool. However, it is not recommended to suppliers to reuse cool packs due to safety and quality assurance reasons.
